

1pps/ToD/Frequency Converter

FUNCTION	INPUT	OUTPUT	SPECIFICATIONS
Combined differential 1pps+ToD serial signal conversion to separate 1pps TTL and ToD RS-232 signals.	RJ-45 connector. Combined differential (RS-422) 1pps and ToD. Normally connected to slave clock output.	1pps TTL (single-ended) pulse on RJ-45 connector (port 2) and BNC female connector (port 7).	Power Supply: USB 5Vdc/3W
			Size: 160 x 35 x 105mm (w x h x d)
		ToD RS-232 signal on DB9 connector (port 6). RJ-45 is normally connected to Paragon 1pps and GPS inputs while the BNC is normally connected to Sentinel 1pps.	Weight: 320g
			Additional reference frequency conversion ratios may be available, contact Calnex for more information.
		Use crossover (null modem cable) to connect ToD RS-232 cable from accessory to the Paragon.	
		Port 1 to Port 2/7 delay = 40ns	
ToD serial signal conversion from ToD RS-232 signals.	ToD RS-232 signal on DB9 connector (port 6).	RJ-45 connector (port 4), RS-422.	Calnex Solutions Ltd Oracle Campus, Linlithgow West Lothian EH49 7LR United Kingdom
1pps TTL signal format converter.	RJ45 connector (port 3), TTL high impedance.	RJ-45 connector (port 4), RS-422. Port 3 to Port 4 delay = 13ns	
10MHz wander measurement vs 10MHz reference on the Paragon.	10MHz on BNC female connector (port 5).	2MHz on BNC female connector (port 8), which tracks input 10MHz wander.	t: +44 (0) 1506 671 416 e: info@calnexsol.com

conversion. Switch selectable.	connector (port 5).	(port 8), frequency locked to input.	
25MHz signal to 10MHz conversion. Switch selectable.	25MHz on BNC female connector (port 5).	10MHz on BNC female connector (port 8), frequency locked to input.	All specifications subject to change without notice.
